Contributions should address issues related to: **Exit strategies for monetary policies** (normalising central banks' balance sheets and policy rates, inflationary and deflationary risks); **Exit strategies for fiscal policies** (What are the risks in terms of higher interest rates and unsustainable debt developments?; Should public deficits and debts be rapidly reduced? Should the focus be on public expenditure or on taxation?); **Exit strategies for public support of the financial sector**; appropriateness of the proposed **new regulations of institutions and financial markets**; Will **new growth strategies** be implemented, especially in the countries where external imbalances had been growing widely before the crisis?; Will the G-20 be able to introduce a **world economic governance**?
